

Claims

- [c1] 1.A strengthened mirror structure, comprising:
A reflection mirror, having a reflection surface and a back surface; and
At least a strengthening element, stuck on said back surface of said reflection mirror through an adhesive.
- [c2] 2.The structure according to claim 1, wherein said reflection mirror is a large reflection mirror.
- [c3] 3.The structure according to claim 1, wherein said reflection mirror is a small reflection mirror.
- [c4] 4.The structure according to claim 1, wherein said adhesive is glue.
- [c5] 5.The structure according to claim 1, wherein said adhesive is twin adhesive.
- [c6] 6.The structure according to claim 1, wherein said strengthening element is a honeycomb plate.
- [c7] 7.The structure according to claim 6, wherein said honeycomb plate is aluminum, one of other metals or paper.
- [c8] 8.The structure according to claim 1, wherein said

strengthening element is smaller than said reflection mirror.

- [c9] 9.The structure according to claim 1, wherein said strengthening element is wider than said reflection mirror so as to form fixing ends.
